

# About Kansans for Health Freedom

*Get to know us!*

## HOW WE GOT STARTED:

Kansans for Health Freedom was started in the Spring of 2019 by three passionate, praying grandmothers. We at KSHF affectionately refer to them as our own CDC of Kansas – Connie, Debbie, and Cindy. They saw what was happening to our children and grandchildren - the exponential rise in childhood chronic disease, cancer, developmental disabilities, autoimmune conditions, and more - and decided they would not stand for it one moment longer. They prayed the rest of us in, and we answered their call.

## WHO WE ARE:

Kansans for Health Freedom is a 501(c)(4) nonprofit organization created for the purpose of reclaiming and upholding health freedoms.

We believe YOU should have the right to make healthcare decisions for yourself and your family with proper informed consent, which implies full transparency and an evaluation of all risks and benefits of any healthcare intervention.

We believe health care is not one-size-fits-all and that health decisions belong solely in the hands of individuals and families, not the government.

We fully believe the stories of mothers and fathers who speak of vaccine injury or death of their children. We also believe adults who have their own personal stories of vaccine injury.

We take a stand against coercion, discrimination, censorship, and all mandates.

## KSHF COMES TOGETHER TO:

- Stop vaccine-related injury and death.
- Mobilize the grassroots of Kansans to stand against all health-related mandates.
- Work with lawmakers to legislate true informed consent for all medical procedures in our state.
- Reestablish financial liability for vaccine manufacturers responsible for vaccine injuries in Kansas.
- Uphold and defend parental rights.

## HOW KSHF DOES OUR WORK:

- **EDUCATION** – Informing the public and those at all levels of state, federal, and local government about the inherent problems with the vaccine program and other medical mandates.
- **CONNECTION** – Providing support for parents, individuals, and families through events and our network of local chapters and community advocates across the state.
- **LEGISLATION** – Actively building relationships with legislators and working with them to write and pass legislation to reclaim and uphold health freedoms.
