

KSHF VALENTINE'S DAY VACCINE CONVERSATION HEARTS

Greetings, Health Freedom Fighters! As Valentine's Day approaches, we have created a way for you to lovingly spread awareness about vaccines in your community!

Enclosed in this document you will find 5 double-sided conversation hearts. The steps are easy! (1) Print them, (2) cut them out, (3) share them!

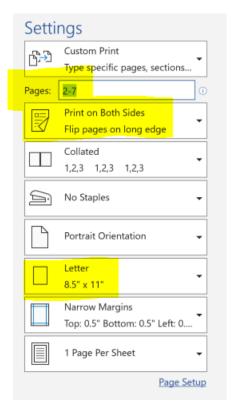

How, where, and with whom should you share? Feel free to get creative, but here are a few ideas:

- Mail / hand them out to your state legislators, county commissioners, local health department, school board members, county sheriff, or other officials
- Leave them around town on tables in public places, pin them to public billboards, etc.
- Hand-deliver them to neighbors and friends
- The possibilities are endless!

HOW TO PRINT FROM HOME:

- 1. Go to File Print
- 2. Choose your printer
- 3. In Settings:
 - a. Print pages 2-7
 - b. Print on both sides, and flipping on the long edge
 - c. Set your paper size to Letter 8.5" x 11"
- 4. Print!
- 5. Cut out each heart about ¼ of an inch inside the line:

Having trouble? Call us at (844) 922-5743 and we will try our best to help!

TRUE LOVE

SAY YES

We you enough to share these truths:

Since 1986, vaccine manufacturers have enjoyed protection from legal liability, making them the only companies in which you cannot sue if their product causes injury or death.

In 2011, Congress declared vaccines "unavoidably unsafe."

As of January 1, 2020 \$4.2 billion of vaccine taxes have been paid out by special magistrate court to families whose child was injured or killed by vaccines.

In over 30 years, ZERO studies have been done on vaccines by the US Department of Health and Human Services.

Although many known toxins are present, vaccines have NEVER been tested for:

- -ability to cause cancer or infertility
- -safety in pregnant women
- -synergistic effect when combined with other vaccines on the schedule
- -interference with the microbiome

LOVE POTION NUMBER 9

... didn't have poison in it. But do you know what is in a vaccine?

Common vaccine ingredients, excipients and contaminants:

-Polysorbate 80 -Alumimum

-Insect cells -Thimerosal / Mercury -Retroviruses -Glyphosate herbicide -Bovine serum -Formaldehyde

-Bovine casein -Aborted fetal cell DNA -Gelatin -Human fetal lung tissue

-Chicken egg -Human albumin -GMOs -Mice brain

-MSG -Monkey kidney cells -E. Coli -Cocker Spaniel kidney cells
