

Why Are Healthy Athletes Dying?

Did you know that since the introduction of the COVID mRNA vaccines, there has been an unprecedented increase in young, healthy athletes dying suddenly due to cardiac arrest?

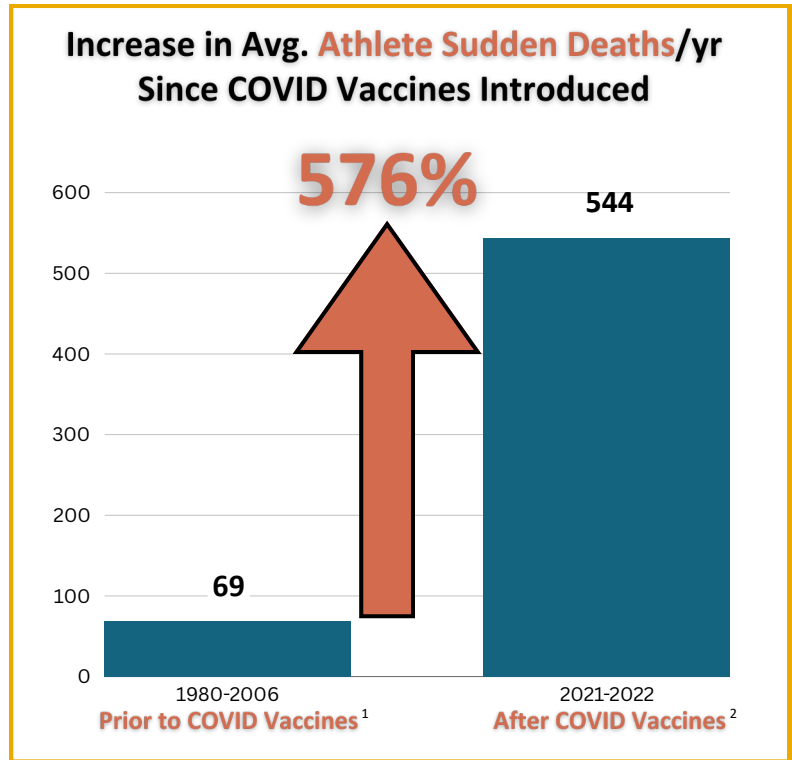

If these COVID mRNA vaccines are so “safe and effective,” why is this suddenly happening to so many young healthy athletes?

Why is there such a concerted worldwide effort to censor calls for data collection and analysis of these deaths to determine the cause of the phenomenon?

Why isn't the media reporting on this? All-cause mortality has increased by 40% worldwide since the roll-out of the COVID mRNA vaccines. Shouldn't doctors, scientists, journalists, and politicians be asking if there's a connection?

In light of the tragic increase in sudden deaths, why do schools and teams refuse to release the vaccine status of athletes? Why PRIVACY now when sports agencies previously boasted PUBLICLY for mandates and happily reported as much as 95% compliance? Why protection for people who are actually public figures and are regularly exposed in the limelight? The FDA has admitted that these vaccines may cause fatal myocarditis.³ Their own published peer-reviewed literature states that these jabs can be fatal. If there is any “care” left in healthcare, now is the time to disclose the truth!

Why are so many posts reporting these events removed from social media platforms? “When you tear out a man’s tongue, you are not proving him a liar, you’re only telling the world that you fear what he might say.”⁴
